

IUCLID 5.2.2 upgrade

Cefic welcomes the release of IUCLID 5.2.2 version, and recommends companies to carefully prepare any upgrading

10th August 2010

Cefic welcomes the release by ECHA of the IUCLID 5.2.2 version, which fixes the issues of compatibility from the previous 5.2.1 version.

This new version IUCLID 5.2.2:

- is fully compatible with the 5.2.0 version,
- allows a successful registration in some specific cases which could not be handled under IUCLID 5.2.0 and
- fixes some identified bugs of the precedent versions of IUCLID.

Cefic wishes to remind that the IUCLID 5.2.0 version allows successful submission of registration (and other types) of dossiers for most of the situations and that the installation of upgraded versions of IUCLID in companies' systems is currently not mandatory.

In the busy period until the November 2010 registration deadline, Cefic advises companies to upgrade systematically their IUCLID system only if the 5.2.0 version prevents from a successful registration (specific cases). In case of planned update of IUCLID version, companies should carefully prepare the implementation of this change through adequate planning and management of resources and time.
