

CO₂ –reduction program Transports Vervaeke – Solvay

Dedicated drivers and transport

AIM

10 %

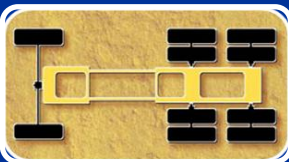

Key success factors

- Partnership with customer
- Find a solid benchmark

- Partnership with suppliers (truck, tires, software)
- Suppliers have to see the advantage

- Install all applicable features such as I-roll, low resistance tires, latest follow-up software (% of free-roll, % of cruise control, # braking, ...)
- Line-up your transport combinations

- Train the trainers fully (cooperation with Volvo)
- Train the drivers accordingly

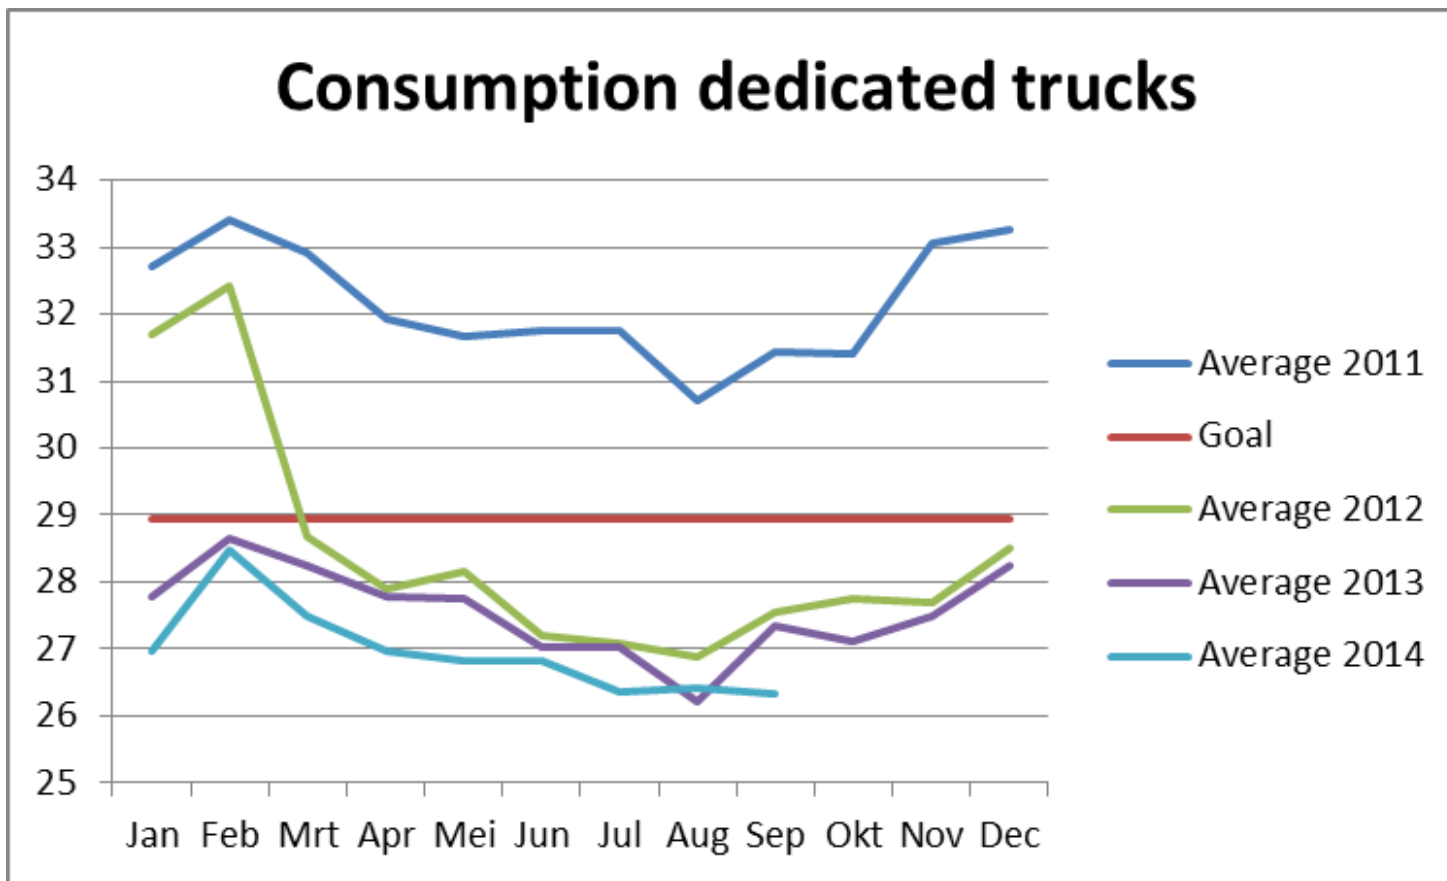

- Daily follow up of the performance
- Constant communication between supervisors and drivers
- Awarding the good result

Partners

- Solvay
- Trimble
- Pirelli
- Volvo

Results

Dual fuel truck

- Result : 22 % CO2 reduction

Dual fuel truck

Disadvantages :

- Availability of LNG
- Investment
- ADR ?
