# CEPIC SIDE EVENT

Tuesday  
8 December 2015

## Innovate and pioneer towards a low carbon future: expect more from chemistry

10:30 - 12:00

Organized by **Cefic, the European Chemical Industry Council**

You are cordially invited to join Cefic's high-level debate on:  
**Making a low-carbon economy future our common business while asking more from Europe's chemical industry innovation power.**

Panelists will include:

- Jean-Pierre Clamadieu, CEO, Solvay - President, Cefic
- Peter Bakker, CEO, World Business Council for Sustainable Development
- Jean-Marc Ollagnier, CEO, Accenture
- Antonio Pflüger, Ministry of Economic Affairs and Energy, Germany
- Laurent Michel, Ministry of Energy, Climate and Environment, France
- Kamel Ben Naceur, Director, International Energy Agency
- Ian Duncan, Member of the European Parliament - EU ETS Rapporteur

**What will life look like in a low-carbon economy?**  
**What products and services will society demand from industry?**  
**What industry solutions already exist today?**

These are just a few questions which will be debated by our panelists together with our audience.

Lunch to follow discussion
