

[SAVE THE DATE]

Cefic - FECC joint workshop “Awareness-raising and knowledge exchange on chemical security”

26 September 2017 - | Solvay Campus | Rue de Ransbeek 310 1120 Brussels |

Today more than ever, secure management of chemicals is of high importance for the chemical industry and its supply chain. Strengthening security capacity across businesses, in particular smaller ones, is crucial.

What’s in it for me?

Are you interested or involved in the setting up a national workshop on (chemical) security? This event is the one for you.

Geared to serve as a blueprint for potential subsequent in country workshops and tips & tricks to maximize the effectiveness of security trainings. Leading security experts will also provide you with insight on many security aspects including making available extensive supporting materials.

Programme (preliminary)

Setting the scene

- What is security about?
- Objectives of the workshop

Plenary sessions

- Security legislation and voluntary initiatives
- Responsible Care Security Code Content and Implementation (leadership commitment, risk analysis, implementation of security measures, training, communications, dialogue and information exchange, response to security threats and incidents, audits, verification and continuous improvement)
- Organising a workshop on security: tips & tricks

Parallel sessions

- Supply chain security
- Cybersecurity
- Personnel security
