

## **Making our impacts measurable and transparent: Contributions of the chemical sector to the SDGs**

### ***Date & Venue:***

***9 November 2017, 15.00h – 16.30h, COP23 Bonn Zone, Meeting room 4***

At this side event experts from industry, academia and policy makers will discuss the role of the chemical industry on the path to achieving the SDGs through a low carbon economy. A focus will lie on approaches to measure sustainability in markets and to showcase best-practice examples of the sector's contributions to the SDGs with a focus on climate action. In this respect, the crucial role of consistent and transparent data as well as approaches to receive those data as prerequisite to evaluate sustainability impacts will also be discussed.

Introduction (15:00h – 15:20h):

### **The role of chemical industry in achieving the SDGs**

*Jorge Soto, International Council of Chemical Associations (ICCA), Director Sustainable Development, Braskem*

### **The need of solid data to measure sustainability impacts**

*Arunabha Ghosh, CEO, Council on Energy, Environment & Water (CEEW)*

Panel Discussion (15:20h – 16:30h)

**Arunabha Ghosh**, CEO, Council on Energy, Environment & Water (CEEW)

**Laurence Graff**, HoU, Directorate B, European and International Carbon Markets, European Commission (tbc.)

**Stefan Haver**, Chair of the Board Chemie<sup>3</sup>, German Chemical Industry Sustainability Initiative

**George H. C. Magalhães Cunha**, FGV, Brazil GHG-Protocol

**Jorge Soto**, International Council of Chemical Associations (ICCA), Director Sustainable Development, Braskem

Moderator: **Dr. Laura Schneider**, econsense (tbc)
